

Economic Damages

ERS Group provides reliable and defensible quantitative estimations of economic loss that combine economic research, statistical analysis, and relevant available data.

ERS
GROUP

Economic Loss Estimates

ERS Group has extensive experience in preparing estimates of economic loss in connection with litigation and commercial disputes. Our experts use sophisticated data analysis that incorporates publicly available and context-specific data, economic research, and statistical analysis, to construct the damage model that best fits the situation. Our models have been used to efficiently assess large numbers of claims, as well as produce individualized, customized estimates for trial and settlement.

Our analyses have included:

Use of multiple regression analysis to estimate overall risk for large class-action matters.

Preparation of multiple regression analyses to estimate damages for individual class members.

Calculation of specific individual claims using cohort analyses.

Computation of stock-option awards using the Black-Scholes valuation method.

Expert Testimony

ERS Group's experts have offered testimony regarding economic loss estimates in federal and state courts, as well as at arbitration, settlement negotiations, and before administrative law judges involving issues that include:

- Antitrust
- Commercial Contracts
- Employment Discrimination
- Insurance Claims
- Intellectual Property
- Lost Earnings
- Personal Injury
- Wage & Hour
- Wrongful Death
- Wrongful Termination
